

ANIMATING PETERLOO

WORKSHEET 1 - CARDBOARD IPAD STAND

You will need:

- Very thick card, 24 x 10cm
- Scissors
- Pen
- Ruler

1. Cut your card to 24 x 10cm. This can be scaled up or down for bigger iPad or smaller iPhone. Fold your card in half.

ANIMATING PETERLOO

WORKSHEET 2 - CARDBOARD IPAD STAND

2. Draw an angled 'L' shape and cut along this line

3. Cut further grooves to support your device and place your iPad in your new stand!

ANIMATING PETERLOO

WORKSHEET 3 – THE PROCESS

Step One

Draw and cut out a character for your animation. If you thought of some additional objects for your animation, cut them out too. Think about moving parts for your animated character. You may want to cut out legs and arms separately so you can blu tack them together and move them in your animation.

Step Two

You may want to make a banner for your character to hold. This can be where your message will appear. If you have other ideas for how to animate your text, great!

Step Three

Cut out the letters you will need for your animated message.

Step Four

Put your device on its stand. Make sure you are somewhere with plenty of light.

Step Five

Use blu tack to put a piece of white card on the wall, this will be your background

ANIMATING PETERLOO

WORKSHEET 3 – THE PROCESS CONT.

Step Six

Open the iMotion app and start new movie.

Step Seven

Position your device so that the white background fills the image.

Step Eight

Stick your character onto the background using blu tack. Use small bits of blu tack for your character and letters as this will make it easier to move them as you animate.

Step Nine

Begin your animation!

Step Ten

Remember to make small changes between each photo and try to keep the device perfectly still.

Step Eleven

You may want to animate the text by taking one photo as each new letter appears. This will make it seem as though the words are appearing by themselves.

ANIMATING PETERLOO

WORKSHEET 4 – THE APP

Step One

Open app to get to start page.

Step Two

Select 'new movie'.

Step Three

Make sure your device is in a landscape position to make a widescreen movie.

Step Four

Tap 'manual', then 'start'.

Step Five

Tap 'capture' each time you're ready for a new photo.

ANIMATING PETERLOO

WORKSHEET 4 – THE APP CONT.

Step Six

Tap 'tools'. The top left icon is for 'onion skin'. This gives you a semi-transparent look at the last photo you took so you can see how much you have moved your object or changed your image.

Step Seven

To review your animation tap 'stop' twice.

Step Eight

To continue to add photos to the same animation, tap 'tools', then the camera icon (top left), select 'manual' again and tap 'resume'.

Step Nine

When you are finished tap stop twice (or 'back' if you don't see 'stop') and tap 'export'.

Step Ten

Select photo library.
